DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claims 1-38, directed to the product and method of making the product, whereas the product comprises an outsole and shank with the shank having a watertight layer covering it and the outsole and shank, as well as the watertight layer, being glued together.

Claims 39-51 are directed to the product and method of making the product, in which a hot-melt glue is applied to a shank, which is then applied to a sole.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The second species only relates to gluing shanks onto shoe soles. This can easily be found in class 36, subclasses 76R, 107 and 108. Therefore, the gluing of the shank to the sole is not considered a special technical feature, as it is already known to exist in the art.

3. A telephone call was made to Carol White on February 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
